

In the claims:

1-29 (Cancelled).

30. (Previously Presented) A mobile terminal comprising:
an output for transmitting an application for credit over a first network;
an input for receiving account information associated with the application
for credit over a second network, said second network comprising a Gateway GPRS
Service Node.

31. (Previously Presented) The mobile terminal of claim 30, wherein the first
network comprises a packet network.

32. (Cancelled)

33. (Currently Amended) The mobile terminal of claim ~~32~~ 30, wherein the
mobile terminal is operable to detect a command preceding an ~~the~~ audio signal and
operable to record the account information after detecting the command.

34. (Previously Presented) The mobile terminal of claim 31, wherein the
application is transmitted during a session over the first network and wherein the account
information is transmitted during a session over the second network, and wherein the
session over the first network is initiated by the mobile terminal and wherein the session
over the second network is initiated by a node sending the account information associated
with the application for credit to the mobile terminal.

35. (Previously Presented) The mobile terminal of claim 34, wherein the
session over the first network is terminated prior to establishment of the session over the
second network.

36. (Previously Presented) The mobile terminal of claim 34, wherein the session over the first network is terminated after establishment of the session over the second network.
